

## **Proxima Software releases FontExpert 2021 Version 18.0 Font Manager for Windows**

*FontExpert 2021 version 18.0 is new major version incorporating improvements, new features, and fixes.*

December 12, 2020 - Proxima Software today has announced the release of FontExpert 2021 version 18.0 font manager for Windows.

This release incorporates many new enhancements including:

- Support to activation of My Collections folders.
- Displaying My Collections states: Activated, Installed, Partially Activated, Inactive.
- Support to automatic activation and synchronization of My Collections on application launch.
- My Collections Properties dialog that allows to configure My Collection folders.
- Better detection and resolution of font conflicts when fonts are activated or installed.
- German translation completely reworked.
- Fixed: Fonts in network folders are now included in search results (in previous version only local fonts were included in search results).
- Fixed: Plug-in searched for fonts in Library and Groups only. Now it searches also in My Collections, including network folders.
- Other fixes and enhancements.

The complete list and description of new features can be found in the release notes for the product, found on the company's website, [proximasoftware.com/fontexpert/](http://proximasoftware.com/fontexpert/)
